

Office Memorandum • UNITED STATES GOVERNMENT

TO :

DIRECTOR, FBI

DATE: 7/25/57

FROM :

SAC, NEW YORK (65-12290)

SUBJECT:

NIKOLA TESLA (Deceased)
IS -YUINFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 7-3-80 BY SP4 JRF/2

24, New York, a United States citizen of Yugoslav extraction, who on occasion, voluntarily furnishes the New York Office with information he considers to be in the interests of the Security of the United States Government, furnished Special Agent NICHOLAS J. MASTROVICH the following information on July 3, 1957:

██████████ stated that a certain woman named Mrs. MARGARET STORM who lives with her husband, JOHN, at the Colonial Hotel, 51 West 81st Street, New York 24, New York, has been issuing newsletters which contain information pertaining to flying saucers and interplanetary matters.

██████████ stated that in his opinion Mr. and Mrs. STORM are exploiting the reputation and genius of NIKOLA TESLA, deceased, inventor of Yugoslav extraction who achieved world wide fame as a result of his inventions in the United States.

TESLA was born in Smiljan, Yugoslavia in July, 1859 and came to the United States in 1894 and became a naturalized United States citizen. In 1886 TESLA designed the arc-lighting system and two years later he invented the Tesla motor and designed a plan for the transmission of alternating current. In subsequent years, TESLA's discoveries and inventions included such fields and appliances as wireless communication, electrical oscillation, radiant power and radio active matter. After 1900, communications and wireless power transmission occupied most of his research.

TESLA's only military invention was a method to which he once alluded but never fully described. This invention was a means whereby an impenetrable "wall of force" can be erected around the United States' borders which would render helpless any military attack. TESLA disclosed the existence of his plan in 1934 and stated he intended to present it to the Geneva Conference but seldom referred to it afterward.

The "New York Times" dated 9/22/40, carried an article setting forth ~~NICOLA~~ TESLA's plan for a "Death Ray". This article included information to the effect that TESLA, on his 84th birthday, July 10, 1940, advised New York Times reporter WILLIAM LAWRENCE that he was ready to divulge to the United States Government the secret of his "teleforce", with which he said airplane motors would be melted at a distance of 250 miles so that an invisible Chinese wall of defense would be built around the country against any attempted attack by an enemy airforce no matter how large. According to TESLA, this "teleforce" was based on an entirely new principle of Physics that "no one has ever dreamed about" and was different from the principle embodied in his inventions relating to the transmission of electrical power from a distance, for which he received a number of basic patents.

TESLA stated that this new type of force would operate through a beam one hundredth millionth of a square centimeter in diameter and could be generated from a special plant that would cost no more than two million dollars and would take only about three months to construct. TESLA stated that a dozen such plants located at strategic points along the coast, according to TESLA, would be enough to defend the United States against all possible aerial attacks. TESLA stated that this beam would melt any engine and would also ignite explosives aboard any bomber. TESLA stated that no possible defense against it could be devised and he asserted that the beam would be all penetrating.

TESLA stated to Mr. LAWRENCE that he makes one important stipulation before he would divulge this secret to the United States Government and that was that should the United States Government decide to take up his offer, he would go to work at once but that the United States Government would have to trust him. TESLA stated that he would suffer "no interference from experts."

In this "New York Times" article Mr. LAWRENCE commented that with conditions as they were in 1940, and with the United States getting ready to spend millions of dollars for National Defense, Mr. TESLA's great reputation as an inventor, who always was many years ahead of his time, should be given careful consideration. Mr. LAWRENCE stated, in his opinion, the United States Government should take Mr. TESLA at his word and commission him to go ahead with the construction of his "teleforce" plant.

The New York file of Mr. TESLA bears no indication that any additional developments were carried on in connection with TESLA's invention and whether or not TESLA fully divulged his new plan to the United States Government.

TESLA died at the age of 85 on January 7, 1943.

Mr. [REDACTED] provided a two page copy of the above mentioned newsletter which Mr. and Mrs. STORM have been distributing in connection with the alleged invention by TESLA, which, according to Mr. and Mrs. STORM, consists of a radio type machine known as the Tesla Set which was invented by Mr. TESLA in 1938 for interplanetary communication. Mr. and Mrs. STORM claim that TESLA's engineers did not complete the Tesla Set until after TESLA's death in 1943. Mr. and Mrs. STORM claim that this Set was placed in operation in 1950 and since that time TESLA engineers have been in close touch with space ships. etc. (X)(P)

NY 65-12290

The Newsletter furnished by Mr. [REDACTED] included (b)(7)(D)
the following names:

MARGARET STORM

JOHN STORM

GEORGE VAN TASSEL, Yucca Valley, California NY

DAN FRY NY N.M.E.X

GEORGE KING, London, England

The files of the New York Office contained
no pertinent information regarding any of the
above mentioned individuals. ~~ART 1A HO NY~~

Two photostatic copies of this newsletter
are being sent to the Bureau for purposes of
information while one copy is being submitted to
the Los Angeles Office for information purposes.
