Dr. Linus Pauling,
3500 Fairpoint,
Pasadena, California.

Dear Dr. Pauling,

Your folder of interesting material reached me this morning; and all of it has been read and noted, including the influence of the dollar profit on disarmament.

No doubt you have read of Nikola Tesla's anti-war machine, brought to the attention of the public in the middle thirties, which is supposed to be capable of erecting an electrical force field along our national borders, through which no enemy power could penetrate.

Such a protective shield would, of course, likewise stir

the ire of the material-
minded. Sincere scientists
would be able to determine
the feasibility of Tesla's idea.
No doubt the idea would be
ridiculed in many quarters,
as has been true down through
the ages.

If one thing I am certain:
God does not want this "strong-
hold of freedom" to be destroyed.
There must be and is a way.

Please do not use your
valuable time for reply.

Respectfully,
Emma Jensen
