

Mr. Tesla Replies to Inquirers.

To the Editor of The New York Times:

I am receiving so many notices and inquiries on the subject of Martian signaling that I shall be much obliged to you if you will kindly refer those who have taken occasion to comment upon this feature of my letter in THE TIMES of Sunday, June 23, to the March number of The Harvard Illustrated Magazine, in which I wrote a short article in response to repeated requests of the editor. What I have stated in that publication and others mentioned therein is all I care to say now, despite tauntings and temptations.

A full technical report descriptive of my apparatus and results of observations I have particular reasons to reserve for two old institutions—academies of science—of both of which I am an-honorary member.

NIKOLA TESLA.

New York, July 2, 1907.
